Announcing the *American Journal of Hematology*’s 2017 Young Investigator’s Award

To enter, manuscripts must be submitted online

Overview: The *American Journal of Hematology* (AJH) is pleased to announce the establishment of, and guidelines for, the 2017 **AJH Young Investigator's Award (AJH-YIA)**. The award of $1,000 will be presented at the 2017 American Society of Hematology meeting, December 9-12, 2017.

Journal Scope: The *American Journal of Hematology* provides broad coverage of experimental and clinical features of blood diseases in humans and in animal models of human disease. The journal publishes original contributions in non-malignant and malignant hematological diseases including clinical and basic studies in hemostasis and thrombosis, immunology, blood banking, and stem cell biology.

Eligibility: The competition is open to clinical and basic scientists at the undergraduate, graduate, postgraduate, resident, and fellow levels working in academia, industry, or research institutions. Applicants may not have more than the equivalent of five years’ full-time postdoctoral or post-residency research experience, as documented by a curriculum vitae and letter of confirmation from a supervisor, mentor, or department head.

Applications: The applicant must submit a single manuscript describing original work in the field of Hematology directly to **AJH online** no later than Monday, August 31, 2017. At
the time of submission, the applicant will check a box indicating that she/he wishes to have the paper considered for this award. The applicant must be the sole or primary author of this work. Manuscripts submitted to AJH prior to this announcement and currently under editorial review/consideration are also eligible for consideration.

Selection Process: The Young Investigator Award Committee consists of the Editor-in-Chief and the Associate Editors for AJH. The winner will be selected among the manuscripts published in AJH in 2017 on the basis of the scientific quality and originality of the work. The announcement of the winner will take place prior to the 2017 ASH meeting. The recipient will be invited to receive the award at the AJH editorial board meeting, which will take place during the 2017 American Society of Hematology meeting December 9-12, 2017.

Timeframe: To be considered for the 2017 AJH-YIA award, a manuscript must be submitted to the AJH website in time for publication during the 2017 calendar year (by August 31, 2017). Manuscripts submitted after August 31, 2017 will be considered for the 2018 award.
