Figure S4.
Figure S4. Cell cycle position controls for Figure 2. (A) DNA content analyses for cdc28-as1 experiments presented in Figure 2A-D. Cell cycle positions before the addition of cycloheximide are shown. (B) DNA content analysis for cdc53-1 experiments presented in Figure 2E-H. Cell cycle positions before the addition of cycloheximide are shown. (C) DNA content analysis for APC experiments presented in Figure 2I. Cell cycle positions before the addition of cycloheximide are shown.
