MARROW is a series of Annals of the New York Academy of Sciences. Each issue presents cutting-edge Original Research manuscripts on topics in basic, translational, and clinical bone and bone marrow biology and medicine, as well as scholarly Reviews, Perspectives, Commentaries, Meeting Reports, and Correspondence.

The scope of MARROW includes regenerative biology, osteoimmunology, intercellular signaling, integrative physiology, hematopoietic malignancies, contribution of bone marrow to metastatic disease, translational models and therapeutic considerations of diseases of bone and bone marrow, developmental aspects of bone marrow and bone, and hematopoiesis.

EDITORIAL BOARD

EDITOR
Mone Zaidi, Mount Sinai School of Medicine

DEPUTY EDITOR
Xu Cao, Johns Hopkins University School of Medicine

EDITORIAL ADVISORY BOARD

Aaron Ciechanover, Technion – Israel Institute of Technology
Roberto Civitelli, Washington University School of Medicine in St. Louis
