ON THE COVER
Fluorescence photomicrograph of muscle from a normal subject, immunostained red for alpha-actinin and green for myopalladin. Myopalladin is a protein in the Z-line of striated muscle that contributes to sarcomere integrity and in which mutations can cause cap myopathy with nemaline rods. See Lornage et al., on pages 467-473 of this issue.

CONTENTS

NEUROLOGY GRAND ROUNDS
333 Infratentorial Superficial Siderosis: Classification, Diagnostic Criteria, and Rational Investigation Pathway
Duncan Wilson, Fiona Chatterjee, Simon F. Farmer, Peter Rudge, Mark O. McCarron, Peter Cowley, and David J. Werring

INVITED EDITORIALS
344 Is This Significant?
Rebecca A. Betensky

348 One Step Backward: Magnetic Resonance Guided Focused Ultrasound Thalamotomy for the Treatment of Medically Refractory Tremor
Ron L. Alterman

351 What Is the Pathway Forward for the Surgical Management of Essential Tremor?
Elan D. Louis, Amar Patel, and Jason L. Gerrard

INVITED COMMENTARY
354 Obituary: Bruce O. Berg, MD, January 2, 1931–October 5, 2016
Donna Ferriero

REVIEWS
355 Emerging Therapies and Challenges in Spinal Muscular Atrophy

369 The Gut Microbiome in Human Neurological Disease: A Review
Helen Tremlett, Kyllynda C. Bauer, Silke Appel-Cresswell, Brett B. Finlay, and Emmanuelle Waubant
