Asian Journal of Control

Contents

Editorial

Special Issue on “Recent Advances in Optimization and Learning in Logical Control Network Systems”  Tielong Shen, Yuhu Wu, Bijoy Ghosh and Shun-ichi Azuma

Review Paper

Recent advances in optimization and game theoretic control for networked systems  Yuhu Wu, Daizhan Cheng, Bijoy K. Ghosh and Tielong Shen

Special Issues

Bayesian selection probability estimation for probabilistic Boolean networks  Mitsuru Toyoda

Subspace controllability of Boolean networks  Zhengping Ji

Minimum time control of large-scale boolean control networks with constraints  Jinfeng Pan, Jun-e Feng, Min Meng and Jianli Zhao

On disturbance decoupling problem of Boolean control networks  Yifeng Li and Jiandong Zhu

State feedback control design to avoid players going bankrupt  Lei Deng, Shihua Fu and Peiyong Zhu

Bisimulations of boolean control networks with impulsive effects and its application in controllability  Qiliang Zhang, Jun-e Feng, Biao Wang and Min Meng

Algebraic method of simplifying Boolean networks using semi-tensor product of Matrices  Yongyi Yan, Jumei Yue and Zengqiang Chen

Reachability and controllability analysis of probabilistic finite automata via a novel matrix method  Zhipeng Zhang, Zengqiang Chen and Zhongxin Liu

Stability and stabilization of evolutionary games with time delays via matrix method  Xiaoye Gao, Jinhuan Wang and Dedong Yang

An average optimal control approach to the set stabilization problem for boolean control networks  Jinwu Gao, Sida Lin, Jixiang Fan and Yunfeng Hu

Dynamics and control of singular boolean networks  Hongsheng Qi and Yupeng Qiao

Topologies on quotient space of matrices via semi-tensor product  Daizhan Cheng and Zequn Liu

Stability analysis of state-triggered impulsive boolean networks based on a hybrid index model  Yuqian Guo, Yawen Shen and Weihua Gui

Language acceptability of finite automata based on theory of semi-tensor product of matrices  Jumei Yue, Yongyi Yan and Zengqiang Chen

Decompositions of finite games: From weighted inner product to standard inner product  Changxi Li, Fenghua He and Haodi Yao

An improved multiple-state observer of Boolean control networks  Junqi Yang, Zihan Gao, Zhiqiang Li and Wei Qian

Controllability and observability of state-dependent switched Boolean control networks with input constraints  Yiliang Li, Jinjin Li, Zhouming Ma, Jun-e Feng and Hongkun Wang
