Aims and Scope
The rapidly increasing world population of aged people has led to a growing need to focus attention on the problems of mental disorder in late life. The aim of the journal is to communicate the results of original research in the causes, treatment and care of all forms of mental disorder which affect the elderly. The journal will be of interest to psychiatrists, psychologists, social scientists, nurses and others engaged in therapeutic professions together with basic neurobiological researchers. It is intended that the journal will provide an international perspective on this important issue. Contributions will be published from countries round the world. Topics covered will include epidemiology of mental disorders in old age, clinical aetiological research, post mortem pathologic al and neurochemical studies, treatment trials and evaluation of services.

Editorial Policy
The over-riding criteria for publication are originality, a high scientific quality and interest to a wide audience of those concerned with all aspects of mental illness in old age. All original papers will be refereed by independent experts in the field. Regular review articles designed to bring the general reader up to date with specialist research in the area will be a feature of the journal. There will be a section reviewing recently published books. Correspondence to the editor will be considered for publication. The editor reserves the right to make alterations in the text of contributions, without altering the technical context, when considered desirable in order to produce either conformity of style or because of space limitations.

Notes for Contributors

These instructions are abridged. Full instructions are published on the Journal’s website under ‘For Authors’—http://wiley onlinelibrary.com/journal/gps. Authors are strongly recommended to read the full instructions online prior to submitting.

1. MANUSCRIPT CATEGORIES

The International Journal of Geriatric Psychiatry invites the following types of submission:

- **Research Articles**
- **Review Articles**
- **Letters to the Editor**
- **Commentary**
- **Editorial**

2. MANUSCRIPT SUBMISSION

All submissions should be made online at the International Journal of Geriatric Psychiatry Scholar One Manuscript site—https://mc.manuscriptcentral.com/gps. New users should first create an account. Once a user is logged onto the site, submissions should be made via the Author Centre.

Review Articles

Review Articles will typically be solicited by the Editors. Authors who wish to submit an unsolicited review should first contact one of the Editors to determine its suitability for publication in the Journal. All reviews will be peer-reviewed. Manuscript structure: Structured Abstract; Introduction; Materials and Methods; Results; Discussion; Acknowledgements; References; Tables; List of figure captions; List of supporting information legends. Overall combined limit of 6 figures/tables. Word limit: 3500 words.

Letters to the Editor

Letters to the Editor, or Correspondence, may be in response to issues arising from recently published articles, or short, free-standing pieces expressing an opinion, but should not exceed 700 words of body text, and are limited to 1 figure/table and 5 references. Letters to the Editor are not subject to external peer-review.

Commentary

Manuscript structure: No abstract; one continuous section with content-specific headings if needed. Word limit: 4500 words.

Editorial

Manuscript structure: No abstract; one continuous section with content-specific headings if needed. Word limit: 3500 words.

3. MANUSCRIPT PREPARATION

Manuscripts must be written in English. Text should be supplied in a format compatible with Microsoft Word for Windows (PC). Charts and tables are considered textual and should also be supplied in a format compatible with Word. All figures (illustrations, diagrams, photographs) should be supplied in jpg, tiff or eps format. All manuscripts must be typed in 12pt font and in double space with margins of at least 2.5 cm.

Manuscripts must comply with the word limits defined in section 2, and include:

- **Title Page**
  - The first page of the manuscript should contain the following information:
    - the title of the paper
    - 2–6 article keywords and up to 4 key points
    - names of authors
    - names of the institutions at which the research was conducted
    - name, address, telephone and fax number, and email address of corresponding author
    - the name(s) of any sponsor(s) of the research contained in the paper, along with grant number(s)
    - the word count of the body text

Structured Abstracts

Authors submitting Research and Review Articles should note that structured abstracts (maximum 250 words) are required. The structured abstract should adopt the format: Objective, Methods, Results, Conclusions. (Authors of Reviews may use Design instead of Method.) Abstracts should contain no citation to other published work. Letter to the Editor category does not require abstract.

Text

This should in general, but not necessarily, be divided into sections with the headings: Introduction, Methods, Results, Discussion, Conclusion.

Correspondence should be formatted in one continuous section.

Tables and Figures

Tables and figures should not be inserted in the appropriate place in the text but should be included at the end of the paper, each on a separate page.

Tables and figures should be referred to in text as follows: Figure 1, Figure 2; Table 1, Table 2. The place at which a table or figure is to be inserted in the printed text should be indicated clearly on a manuscript. Each table and/or figure must have a legend that explains its purpose without reference to the text.

References

All references should be numbered consecutively in order of appearance and should be as complete as possible. In text citations should cite references in consecutive order using Arabic superscript numerals.

For more information about this reference style, please see the AMA Manual of Style.

Journal article

Book

Please note that journal title abbreviations should conform to the practices of Chemical Abstracts.

Internet Document

4. ADDITIONAL INFORMATION ON ACCEPTANCE

Copyright

To enable the publisher to disseminate authors’ work to the fullest extent, all authors must sign a Copyright Transfer Agreement, transferring copyright in the article to John Wiley & Sons. An agreement with original signatures will be requested if a paper is accepted for publication. A copy of the agreement to be used can be downloaded from the Journal homepage.

Proofs

Proofs of accepted articles will be sent to the author for checking. This stage is to be used only to correct errors that may have been introduced during the production process. Prompt return of the corrected proofs, preferably within two days of receipt, will minimise the risk of the paper being held over to a later issue.

Offprints

Free access to the final PDF offprint of your article will be made available via Author Services.

Early View

The journal offers rapid publication via Wiley’s Early View service. Early View (Online Version of Record) articles are published on Wiley Online Library before inclusion in an issue. Note there may be a delay after corrections are received before the article appears online, as Editors also need to review proofs. Once the article is published on Early View, no further changes to the article are possible. The Early View article is fully citable and carries an online publication date and DOI for citations.
RESEARCH ARTICLES

261  Diagnostic accuracy of the Montreal Cognitive Assessment (MoCA) for cognitive screening in old age psychiatry: Determining cutoff scores in clinical practice. Avoiding spectrum bias caused by healthy controls: G. DAUTZENBERG, J. LIJMER AND A. BEEKMAN

276  Perceived social isolation and cognitive functioning. Longitudinal findings based on the German Ageing Survey: A. HAJEK, S. G. RIEDEL-HELLER AND H.-H. KÖNIG

302  Effect of income on length of stay in a hospital or long-term care facility among older adults with dementia in Japan: F. MURATA, A. BABAZONO AND H. FUKUDA

312  Antihypertensive treatment and depressive symptoms in Chinese middle-aged and older hypertensive adults: A population-based longitudinal study: Y. JIN AND P. HE
