Aims & Scope
This Journal publishes articles on all aspects of health economics: theoretical contributions, empirical studies and analyses of health policy from the economic perspective. Its scope includes the determinants of health and its definition and valuation, as well as the demand for and supply of health care; planning and market mechanisms; micro-economic evaluation of individual procedures and treatments; and evaluation of the performance of health care systems. Contributions should typically be original and innovative. As a rule, the Journal does not include routine applications of cost-effectiveness analysis, discrete choice experiments and costing analyses. Editorials are regular features, these should be concise and topical. Occasionally commissioned reviews are published and special issues bring together contributions on a single topic. Health Economics Letters facilitate rapid exchange of views on topical issues. Contributions related to problems in both developed and developing countries are welcome.

Associate Editors
Professor David Bishai
Johns Hopkins Bloomberg School of Public Health, Baltimore, USA

Professor W. David Bradford
Department of Public Administration and Policy,
University of Georgia, USA

Professor Cathy Bradley
University of Colorado Comprehensive Cancer Center
Department of Health Management, Systems and Policy

Health Economics Research Centre, University of Oxford, UK
INSTRUCTIONS FOR AUTHORS

These instructions are abridged. Authors are encouraged to view the full instructions published on the Journal’s homepage under ‘For Authors’ (www.healtheconjournal.org).

1. MANUSCRIPT CATEGORIES

**Health Economics** invites the following types of submission:

**Research articles.** Research articles are the Journal’s primary mode of communication. Research articles should not exceed 5000 words of body text. Tables and figures should be kept to a minimum.

**Health Economics Letters.** The Journal encourages the submission of concise reports which are published as Health Economics Letters. These should not exceed 2000 words of body text. A summary is required. All Letters are peer-reviewed.

**Editorials.** Editorials—summaries of pertinent issues, commentaries on recently published papers, or freestanding pieces expressing an opinion—are typically invited. Authors who wish to submit an unsolicited Editorial should first contact one of the Editors to determine its suitability for publication in the Journal. Editorials should not exceed 1500 words of body text.

2. SUBMISSION OF MANUSCRIPTS

All submissions should be made online at the **Health Economics ScholarOne Manuscripts** site (formerly known as Manuscript Central)—http://mc.manuscriptcentral.com/hec. New users should first create an account. Once a user is logged onto the site, submissions should be made via the Author Centre.

Authors must also supply to the Editorial Office:
- a Copyright Transfer Agreement with original signature(s)—without this we are unable to accept the submission, and
- permission grants—if the manuscript contains extracts, including illustrations, from other copyright works (including material from on-line or intranet sources) it is the author’s responsibility to obtain written permission from the owners of the publishing rights to reproduce such extracts using the Wiley Permission Request Form. Both forms can be downloaded from the Journal homepage.

Submission of a manuscript will be held to imply that it contains original unpublished work and is not being submitted for publication elsewhere at the same time.

**Data Protection.** By submitting a manuscript to or reviewing for this publication, your name, email address, and affiliation, and other contact details the publication might require, will be used for the regular operations of the publication, including, when necessary, sharing with the publisher (Wiley) and partners for production and publication. The publication and the publisher recognize the importance of protecting the personal information collected from users in the operation of these services, and have practices in place to ensure that steps are taken to maintain the security, integrity, and privacy of the personal data collected and processed. You can learn more at https://authorservices.wiley.com/statements/data-protection-policy.html

3. EDITORIAL OFFICE

James Cook, 9600 Garsington Road, Oxford OX4 2DQ, UK. E-mail: hec@wiley.com

4. PREPARATION OF MANUSCRIPTS

Manuscripts must be written in English.

Text should be supplied in a word processed format such as Microsoft Word for Windows. Latex files may be submitted provided that a pdf file is provided in addition to the source file. Charts and tables are considered textual and should be supplied in the same format. Figures (illustrations, diagrams, photographs) should be supplied in gif, jpeg, tiff or eps format.

All manuscripts must be typed in 12 pt font with lines double spaced and margins of at least 2.5 cm.

Abbreviations must be defined when first used, both in the abstract and in the main text.

Manuscripts must be as succinct as possible. Repetition of information or data in different sections of the manuscript must be carefully avoided. Text must comply with the word limits defined above, and, where appropriate, include:

**Title Page.** The first page of all manuscripts (including correspondence) should contain the following information:

1. the title of the paper
2. a running head not exceeding 50 characters
3. 2–6 article keywords
4. manuscript word, table and figure count
5. names of authors
6. names of the institutions at which the research was conducted
7. name, address, telephone and fax number, and email address of the corresponding author
8. a statement of all funding sources that supported the work
9. any conflict of interest disclosures

**Abstracts.** Abstracts (maximum 200 words) are required for all articles. Abstracts should contain no citations to previously published work.

**Text.** This should in general, but not necessarily, be divided into numbered sections with the headings: Introduction, Methods, Results, Discussion, Acknowledgements, References, Tables, Legends and Figures.

**Headings** should be numbered consecutively, e.g., 1. INTRODUCTION; 2. METHODS; 2.1. Literature search; 2.2. Study selection; 3. RESULTS.

**Tables and Figures.** Tables and figures should be inserted in the appropriate place in the text.

Tables and figures should be referred to in text as follows: Figure 1, Figures 2–4; Table I, Table II. The place at which a table or figure is to be inserted in the printed text should be indicated clearly on a manuscript. Each table and/or figure must have a legend that explains its purpose without reference to the text.

Authors are themselves responsible for obtaining permission to reproduce previously published figures or tables.

**References.** References should be in ‘APA’ format, i.e., names and dates in brackets in the text (Jones, 2000; Smith & Jones, 2001; Jones et al., 2002), and the full reference listed at the end of the paper, in alphabetical order by first author, as follows:

5. ADDITIONAL INFORMATION ON ACCEPTANCE

**Copyright.** To enable the publisher to disseminate authors’ work to the fullest extent, all authors must sign a Copyright Transfer Agreement, transferring copyright in the article to John Wiley & Sons. An agreement with original signatures will be requested if a paper is accepted for publication. A copy of the agreement to be used can be downloaded from the Journal homepage.

**Proofs.** Proofs of accepted articles will be sent to the author for checking. This stage is to be used only to correct errors that may have been introduced during the production process. Prompt return of the corrected proofs, preferably within two days of receipt, will minimise the risk of the paper being held over to a later issue.

**Offprints.** Free access to the final PDF offprint of your article will be available via Author Services only. Please therefore sign up for Author Services if you would like to access your article PDF offprint and enjoy the many other benefits the service offers.

**EarlyView.** EarlyView is Wiley’s exclusive service presenting individual articles online as soon as they are ready before the release of the compiled print issue. EarlyView articles are complete, citable and are published in an average time of 6 weeks from acceptance.

**OnlineOpen.** OnlineOpen is available to authors of primary research articles who wish to make their article available to non-subscribers on publication, or whose funding agency requires grantees to archive the final version of their article. With OnlineOpen, the author, the author’s funding agency, or the author’s institution pays a fee to ensure that the article is made available to non-subscribers upon publication via Wiley Online Library, as well as deposited in the funding agency’s preferred archive. For the full list of terms and conditions, see http://wileyonlinelibrary.com/onlineopen#OnlineOpen_Terms

Any authors wishing to send their paper OnlineOpen will be required to complete the payment form available from our website at: https://authorservices.wiley.com/authoronlineopen_order.asp

Prior to acceptance there is no requirement to inform an Editorial Office that you intend to publish your paper OnlineOpen if you do not wish to. All OnlineOpen articles are treated in the same way as any other article. They go through the journal’s standard peer-review process and will be accepted or rejected based on their own merit.
Contents

VOLUME 29 NUMBER 2 FEBRUARY 2020

RESEARCH ARTICLES

**Conditional cash transfers, spillovers, and informal health care: Evidence from Peru:** N. Guerrero, O. Molina and D. Winkelried ........... 111

**Doctors’ response to queues: Evidence from a Portuguese emergency department:** B. Martins and L. Filipe ................................................................. 123

**Closing down the shop: Optimal health and wealth dynamics near the end of life:** J. Hugonnier, F. Pelgrin and P. St-Amour ..................... 138

**The effect of unemployment on the smoking behavior of couples:** J. Everding and J. Marcus ................................................................. 154

**Reference-based multiple imputation for missing data sensitivity analyses in trial-based cost-effectiveness analysis:** B. Leurent, M. Gomes, S. Cro, N. Wiles and J. R. Carpenter ................................................................. 171

**When ignorance is bliss: Intentional agnosticism in drug approval:** V. Litvin .............................................................................................. 185

**Framing Flexible Spending Accounts: A Large-Scale Field Experiment on Communicating the Return on Medical Savings Accounts:** J. Leight and N. Wilson ................................................................. 195

**Do hospitals respond to decreasing prices by supplying more services?:** M. Salm and A. Wübker ................................................................. 209

**Factors associated with the timing of abortions:** F. Gonzalez, T. Quast and A. Venanzi ................................................................. 223

HEALTH ECONOMICS LETTER

**Survey modes comparison in contingent valuation: Internet panels and mail surveys:** M. Ryan, E. Mentzakis, C. Matheson and C. Bond ............. 234
