DOI: 10.1002/lpor.201700113

In article number 1700113, Equation (6.9) included an incorrect variable in the right side of the equation. It should read as follows:

\[
\frac{\gamma}{\gamma_0} = \sum_m F_m \frac{Q_m^2}{\sigma^2} \frac{(\frac{\Omega_m}{\gamma})^2}{(\omega - \Omega_m)^2 + (\frac{\Omega_m}{\gamma})^2} \left[ 1 + 2Q_m \frac{\omega - \Omega_m}{\Omega_m} \frac{\text{Im}(V_m)}{\text{Re}(V_m)} \right]
\]

The correct variable is highlighted in red.

The authors apologize for the error and any resulting confusion.
