### Full-Length Papers

**1181** **Distal amyloid β-protein fragments template amyloid assembly**  
Thanh D. Do, Smriti Sangwan, Natália E. C. de Almeida, Alexandre I. Ilitchev, Maxwell Giammona, Michael R. Sawaya, Steven K. Buratto, David S. Eisenberg, and Michael T. Bowers

**1191** **Protein–protein interactions controlling interfacial aggregation of rhIL-1ra are not described by simple colloid models**  
Lea L. Sorret, Madison A. DeWinter, Daniel K. Schwartz, and Theodore W. Randolph

**1205** **A peptide-display protein scaffold to facilitate single molecule force studies of aggregation-prone peptides**  
Ciaran P. A. Doherty, Lydia M. Young, Theodoros K. Karamanos, Hugh I. Smith, Matthew P. Jackson, Sheena E. Radford, and David J. Brockwell

**1218** **Depletion of amyloid-β peptides from solution by sequestration within fibril-seeded hydrogels**  
Wai-Ming Yau and Robert Tycko

**1231** **Atomic structures of corkscrew-forming segments of SOD1 reveal varied oligomer conformations**  
Smriti Sangwan, Michael R. Sawaya, Kevin A. Murray, Michael P. Hughes, and David S. Eisenberg

**1243** **Dynamic protein folding at the surface of stimuli-responsive peptide fibrils**  
Radhika P. Nagarkar, Stephen E. Miller, Sheng Zhong, Darrin J. Pochan, and Joel P. Schneider

**1252** **Inhibition of amyloid beta fibril formation by monomeric human transthyretin**  
Kanchan Garai, Ammon E. Posey, Xinyi Li, Joel N. Buxbaum, and Rohit V. Pappu
Exploring the role of post-translational modifications in regulating α-synuclein interactions by studying the effects of phosphorylation on nanobody binding
Farah El Turk, Erwin De Genst, Tim Guilliams, Bruno Fauvet, Mirva Hejjaoui, Justin Di Trani, Anass Chiki, Anthony Mittermaier, Michele Vendruscolo, Hilal A. Lashuel, and Christopher M. Dobson

Biophysical characterization and molecular simulation of electrostatically driven self-association of a single-chain antibody
Christopher J. O’Brien, Cesar Calero-Rubio, Vladimir I. Razinkov, Anne S. Robinson, and Christopher J. Roberts

Solid nuclei and liquid droplets: A parallel treatment for 3 phase systems
Frank A. Ferrone

Crystal structures of amyloidogenic segments of human transthyretin
Lorena Saelices, Stuart A. Sievers, Michael R. Sawaya, and David S. Eisenberg

Seeding and cross-seeding fibrillation of N-terminal prion protein peptides PrP(120–144)
Yiming Wang and Carol K. Hall

Structure and dynamics of the extended-helix state of alpha-synuclein: Intrinsic lability of the linker region
Yoon-Hui Sung and David Eliezer

Parallel chromatography and in situ scattering to interrogate competing protein aggregation pathways
Diana Gomes, Rebecca K. Kalman, Rebecca K. Pagels, Miguel A. Rodrigues, and Christopher J. Roberts

Methods and Applications

Weak IgG self- and hetero-association characterized by fluorescence analytical ultracentrifugation
