Volume 56, Issue 5, May 2019

Research Articles

• Black girls speak STEM: Counterstories of informal and formal learning experiences:
  Natalie S. King and Rose M. Pringle ................................................................. 539
  Published online 10 October 2018 in Wiley Online Library

• Impact of model-based science curriculum and instruction on elementary students’ explanations for
  the hydrosphere: Ben Baumfalk, Devarati Bhattacharya, Tina Vo, Cory Forbes, Laura Zangori,
  and Christina Schwarz ................................................................. 570
  Published online 11 October 2018 in Wiley Online Library

• Self-beliefs in organic chemistry: Evaluation of a reciprocal causation, cross-lagged model:
  Rebecca E. Gibbons and Jeffrey R. Raker ................................................................. 598
  Published online 2 October 2018 in Wiley Online Library

• A systematic review characterizing and clarifying intrinsic teaching challenges linked to
  inquiry-based practical work: Fru Vitalis Akuma and Ronel Callaghan ................................................................. 619
  Published online 2 October 2018 in Wiley Online Library

• Investigation of the science achievement models for low and high achieving schools and gender
  differences in Turkey: Ömer Acar ................................................................. 649
  Published online 10 October 2018 in Wiley Online Library
The official journal of NARST: A Worldwide Organization for Improving Science Teaching and Learning through Research

Editors
Fouad Abd-El-Khalick, The University of North Carolina at Chapel Hill, USA and Dana L. Zedler, University of South Florida, USA

Managing Editor: Elizabeth C. Niswander, University of Illinois at Urbana-Champaign, USA

Advocates
Valerie L. Akerson, Indiana University Bloomington, USA
Saeoum Boujaoude, American University of Beirut, Lebanon
David E. Brown, University of Illinois at Urbana-Champaign, USA
Michael Cough, Texas A&M University, USA
Charlene M. Czerniak, University of Toledo, USA
Patricia Friedrichsen, University of Missouri-Columbia, USA
Benjamin C. Herman, University of Missouri-Columbia, USA
Norman G. Lederman, Illinois Institute of Technology, USA
Doug Lombardi, Temple University, USA
Felicia Moore Mensah, Teachers College, Columbia University, USA

Editorial Associates:
Sahar Alameh, University of Illinois at Urbana-Champaign, USA
Brian Cartiff, The University of North Carolina at Chapel Hill, USA

Author Guidelines

The Journal of Research in Science Teaching (JRST) is the official journal of NARST. A Worldwide Organization for Improving Science Teaching and Learning through Research. JRST seeks to publish the highest quality articles that advance the understanding of science teaching and learning and are likely to have a significant impact on the field of science education and science education policy. JRST welcomes manuscripts from authors around the world, and accepts work from a full range of theoretical frameworks and research methodologies.

Types of Manuscripts
You may submit a variety of materials for publication in JRST, provided they are not currently under consideration by other journals. Manuscripts can assume (but are not limited to) the following forms:

- Articles: Many types of scholarly manuscripts about science teaching and learning are within JRST’s domain, including, but not limited to: investigations employing experimental, qualitative, ethnographic, historical, survey, philosophical, or case study research approaches; position papers; policy perspectives; and critical reviews of the literature. JRST accepts articles up to 40 pages in length (excluding online supplementary materials). The 40 pages include primary manuscript text (should be double-spaced), references (could be single-spaced), and tables and figures (could be single-spaced).

- Reviews: Articles are expected to reflect the best scholarly practice relevant to the study design. It is expected that you establish the importance of the study for science teaching and learning with reference to previous literature (including relevant articles from the JRST), provide a link between the problem and the study design, establish and justify the guiding theoretical framework and report the study methodology clearly and concisely. Data should be clearly presented, claims supported by evidence, with findings and implications that are clearly presented and advance the field.

- Comments and Criticisms: These should contain expressions of opinion or information relating to articles published previously or to matters of interest to science educators. This section of JRST will be the forum where the readers may express any reasonable view on a matter relevant to science teaching and learning. Submissions for Comments and Criticisms should not typically exceed 1000 words (including references). An abstract is not required. All other instructions for submitting a manuscript apply and should be followed accordingly.

English Editing Resources
Authors for whom English is a second language may choose to have their manuscript professionally edited before submission to improve the English. A list of independent editors of editing services can be found at http://wileyeditingservices.com. Japanese authors can also find a list of local English improvement services at http://www.wiley.co.jp/journal/editorservice.html.

All services are paid for and arranged by the author, and use of one of these services does not guarantee acceptance or preference for publication.

Formatting and Submission
Complete guidelines for the formatting requirements and submission of manuscripts, as well as a description of the review process and expectations, are available online in our guidelines for authors at http://bit.ly/JRSTAuthor-Guidelines.

APA Style Resources
Information and online courses covering the Publication Manual of the American Psychological Association may be found online at http://www.apastyle.org. The manual may be ordered directly from that site.

Correspondence
The JRST editorial office is happy to assist with technical issues, questions about submissions, or other correspondence concerning submissions related to editorial decisions and reviews. The editorial team also welcomes authors’ feedback. The editorial office may be contacted at:

Editorial Board
Term Expiring 2020
Meesa Balgopal, Colorado State University, USA
Alberto Belloch, Queensland University of Technology, Australia
Ravi Dissanayake, Brunel University, USA
Ron Gray, Northern Arizona University, USA
Tasos Hairakas, University of Cyprus, Cyprus
Woo-Yu Lee, National Chiangai University of Education, Taiwan
Jennifer CLEWSON, Carver College, USA
Soohiyo Park, North Carolina State University, USA
David Smouge, Michigan State University, USA
Becce Whitworth, University of Mississipp, USA

Term Expiring 2021
William Boone, Miami University of Ohio, USA
Julie Brown, University of Florida, USA
Ibrahim Delton, Usak University, Turkey
Cesar Delgado, North Carolina State University, USA
Patrick Fendler, Georgia State University, USA
Gavin Fujiu, University of Iowa, USA
Jonathan Grooms, The George Washington University, USA
Kristin Granbom, University of Arizona, USA
Bryan Henderson, Arizona State University, USA
Cari Herrmann-Abell, BCSC Science Learning, USA
Todd Hutter, University of Alabama, USA
Edward Lyon, Sonoma State University, USA
Subramaniam Manathuran, Nanyang Technological University, Singapore
Catherine Riegel-Crumb, University of Texas at Austin, USA
Kiyoh Yojito, The University of North Carolina at Chapel Hill, USA
Lindsey Wheeler, University of Virginia, USA
Christopher Wilson, BSCS, USA

Term Expiring 2022
Allison Antink-Meyer, Illinois State University, USA
Shahry Araghi, Technion Israel Institute of Technology, Israel
Joe Brob, Old Ellicott City, USA
Emily Dar, Florida International University, USA
Randy Don, Florida International University, USA
David Greeton, Griffith University, Australia
Rebecca Hile, Texas Tech University, USA
Shilamit Kapon, Technion Israel Institute of Technology, Israel
Christine McDonald, Griffith University, Australia
Milissa Park, Texas Tech University, USA
Joshua Rosenberg, University of Tennessee-Knoxville, USA
Shane Turlow, University of Rhode Island, USA
Zongming Zhao, Michigan State University, USA
Lin Zhang, Providence College, USA

The University of North Carolina at Chapel Hill, USA

Columbia University, USA

Felicia Moore Mensah, Teachers College, Columbia University, USA

Managing Editor: Elizabeth C. Niswander, University of Illinois at Urbana-Champaign, USA

Associate Editors
Russ H. Nehm, University at Stony Brook, SUNY, USA
Kristi Neumann, Leibniz-Institute for Science and Mathematics Education, Germany
Manson Nia, Universidad de Oriente, Venezuela
Joanne K. Olson, Texas A&M University, USA
Gillian H. Roehl, University of Minnesota, USA
Troy D. Sadler, University of North Carolina at Greensboro, USA
Victor Sampson, The University of Texas at Austin, USA
Reine S. Schwartz, Georgia State University, USA
Amy Taylor, University of North Carolina Wilmington, USA
Geeta Verma, University of Colorado, USA
Nomi Wight, University of Buffalo, SUNY, USA
Anat Yarden, Weizmann Institute of Science, Israel

Term Expiring 2019
Sonoma State University, USA
University of Florida, USA
National Changhua University of Education, Taiwan
The George Washington University, USA
University of Arizona, USA
University of Virginia, USA
University of Texas at Austin, USA
University of Illinois at Urbana-Champaign, USA
Dana L. Zeidler, University of Illinois at Urbana-Champaign, USA
