Reference Guide

The International Executive performs a reading service for those concerned with international business. The staff checks current books and over 200 periodicals, noting all material basic to management of international operations. These books and articles are listed with descriptive notes in the reference section. A number of books and articles are selected for summarizing. The selection is designed to keep readers abreast of current thinking, experience and information bearing on international business. The books and articles included cover the range of published material and do not necessarily represent the views of the staff.

The bars on the cover are a code to facilitate identification of a particular issue when unbound copies are filed on a shelf. The bars at the top indicate the year (e.g. 6 bars for 1976), the narrow bars at the bottom indicate the issue, (e.g. 1 bar for #1 or the Winter issue).
