An error was identified in the published article by Timmons & Webb (2016) doi: 10.1002/vms3.21.

On page 119, Materials and Methods section, in the third sentence of subsection “CUPRAC Assay”, the phrase “50 μL 10.0 mmol/L copper (II) chloride dihydrate” was missing. It should read:

“For the standard curve, 50 μL of a 7.5 mmol/L neocuproine hydrochloride monohydrate solution, 50 μL 10.0 mmol/L copper (II) chloride dihydrate, and 50 μL of a 1.0 mol/L ammonium acetate buffer, in that order (the CUPRAC solution), were added to 24 wells of a 96 well flat bottom plate.”
