Erratum

The caption for the map published on page 13, was published incorrectly and is now corrected online.

**Original text:** Crop-type map of the Netherlands based on a time series of 2017 data during the growing season from the Copernicus Sentinel-1 and Sentinel-2 missions.

**Corrected text:** National administrations will now define the ‘baseline’ requirements, in line with the requirements and standards set out in the EU-level basic act, thereby providing more subsidiarity and greater flexibility to national administrations to design national rules.

We apologise for this error.
