Corrigendum

The authors would like to draw the reader’s attention to an error in the following article:

Chak Sing Lau, Faith Chia, Andrew Harrison et al. (2015) APLAR rheumatoid arthritis treatment recommendations. *Int J Rheum Dis* 18, 685-713.

On page 691 of this article, Section 1 – General RA treatment strategies under Recommendations column of Table 3, numbers 7 and 8 have been mistakenly interchanged.

It should be corrected as:

7. All patients should be assessed clinically at presentation for extra-articular disease manifestations, comorbidities, and infections such as TB and hepatitis (II). Information on vaccination status and special situations such as pregnancy and lactation should be obtained (II).

8. Safety monitoring while patients are on bDMARD therapy is likewise recommended.

The authors apologize for this error and any confusion it may have caused.
