Aim and scope

The aim of Acta Neurologica Scandinavica is to publish manuscripts of a high scientific quality representing original clinical, diagnostic or experimental work in neuroscience. The scope is to act as an international forum for the dissemination of information advancing the sciences or practice of this subject area. Papers in English will be welcomed, especially those which bring new knowledge and observations from the application of therapies or techniques in combating a broad spectrum of neurological disease and neurodegenerative disorders. Relevant articles on the basic neurosciences will be published where they extend present understanding of such disorders. Priority will be given to review of topical subjects.

Papers requiring rapid publication because of their significance and timeliness will be included as "Clinical commentaries" not exceeding two printed pages, as will "Clinical commentaries" of sufficient general interest. Debate within the specialty is encouraged in the form of "Letters to the editor". All submitted manuscripts falling within the overall scope of the journal will be assessed by suitably qualified referees.

Pre-Submission English-Language Editing

Authors for whom English is a second language may choose to have their manuscript professionally edited before submission to improve the English. A list of independent suppliers of editing services can be found at http://authorservices.wiley.com/bauthors/english_language.asp. Japanese authors can also find a list of local English improvement services at http://www.wiley.co.jp/journals/editcontribute.html. All services are paid for and arranged by the author, and use of one of these services does not guarantee acceptance or preference for publication.
