Corrigendum

The authors would like to draw the reader’s attention to the following errors in their article:

On page 88, last sentence of S. aureus-induced ALI animal model section, “(n = 9-10 for each group)” should be deleted. It should read as “Bronchoalveolar lavage (BAL) fluid was collected for enumerating the number of total white cells and neutrophils, and pathological staining was performed, respectively.”

On page 93, right panel of Figure 5(B) is incorrect. The corrected image is shown below:

The authors apologize for these errors.
