In this issue

Serum tryptophan and life expectancy
DNA methylation as a potential biomarker
Infectious complications in ANCA-associated vasculitis
Aims & Scope

The European Journal of Clinical Investigation (EJCI), in publication since 1970, is a peer-reviewed general-interest biomedical journal with a broad readership. It is the official journal of the European Society for Clinical Investigation (ESCI) and it is published monthly by Wiley Blackwell. It considers any original contribution from the most sophisticated basic molecular sciences to applied clinical and translational research and evidence-based medicine across a broad range of subspecialties. The EJCI publishes reports of high-quality research that pertain to the genetic, molecular, cellular, or physiological basis of human biology and disease, as well as research that addresses prevalence, diagnosis, course, treatment, and prevention of disease. We are primarily interested in studies directly pertinent to humans, but submission of robust in vitro and animal work is also encouraged. Interdisciplinary work and research using innovative methods and combinations of laboratory, clinical, and epidemiological methodologies and techniques is of great interest to the journal. Several categories of manuscripts (for detailed description see below) are considered: editorials, original articles (also including randomized clinical trials, systematic reviews and meta-analyses), reviews (narrative reviews), opinion articles (including debates, perspectives and commentaries); and letters to the Editor.

European Society for Clinical Investigation

Founded 12 February 1967

Objectives
The objectives of the Society are the advancement of medical practice through science; the cultivation of clinical research by the methods of the natural sciences; the correlation of science with the art of medical practice; the fostering of high standards of ethical practice and investigation; and the diffusion of a spirit of fraternity and international co-operation among and through its members.

Membership
Any person who has been actively involved in medical research in Europe, for example by involvement in original investigations in clinical or allied sciences of medicine, can apply for membership of ESCI. Members will receive the EJCI monthly.

Young scientists under the age of 30 can apply for junior membership (for a maximum of up to three years) to a reduced membership fee. Any company, corporation, organisation, or trust can apply for corporate membership in the Society.

Meetings
The Society holds one Annual Scientific Meeting each year, usually in April. Meetings are held at different centres in Europe. Other Society’s activities include the sponsorship of Workshops and Postgraduate Courses and the encouragement of the exchange of Scientists between Laboratories.

Agreement between the European Society for Clinical Investigation and the American Federation for Medical Research
An agreement has been reached between the councils of the ESCI and AFMR as follows:
(i) ESCI members can now submit abstracts for presentation at the joint Annual Meetings of the AFMR, AAP and ASCI.
(ii) ESCI members can apply for membership of AFMR on the normal terms. Those wishing to apply for membership should obtain an application form from a recent issue of the Journal of Investigative Medicine.
(iii) AFMR members can submit abstracts for presentation at the Annual Scientific Meetings of ESCI. Details of ESCI Meetings will appear regularly in the Journal of Investigative Medicine, and AFMR members can obtain ESCI abstract forms from the ESCI Central Office.
(iv) AFMR members can apply for membership of ESCI on the normal terms.

Secretary-Treasurer
Enquiries regarding membership of the Society or any of its activities should be addressed to:
Dr. H.M. Nathoe, MD, PhD
European Society for Clinical Investigation (ESCI),
