Ecological Management & Restoration

Linking science and practice

Research targeted to improved management

Considering fauna too
Values of weedy regrowth
The role of historical references
Interview with Prof David Lindenmayer
Reviewing revegetation investment models
Analysing risk in three AWC wildlife sanctuaries
Habitat preferences of small fish: restoration insights
Comparison of direct seeding and planting for restoration
“I believe one cannot gain true ecological literacy without a great empathy with and understanding of nature and how it functions … one’s heart also needs to be involved”

Charles Massey (Call of the Reed Warbler)
