Expert Systems:
The Journal of Knowledge Engineering

Editor-in-Chief, Jon G. Hall, Expert Systems, Computing Department, The Open University, Walton Hall, Milton Keynes, MK7 6AA, UK

Guide for authors

Note to NIH Grantees: Pursuant to NIH mandate, Wiley will post the accepted version of contributions authored by NIH grant-holders to PubMed Central upon acceptance. This accepted version will be made publicly available 12 months after publication. For further information, see www.wiley.com/go/nihmandate

Expert Systems: The Journal of Knowledge Engineering is a technical journal that is published five times a year, and is devoted to all aspects of knowledge engineering. Within the scope of the Journal are individual methods and techniques in knowledge acquisition and representation, as well as their application and evaluation, and the construction of systems based thereon. The Journal welcomes articles on any subject within its remit.

Articles should contain significant technical information that will be of general interest to people working in that field and should present information on the technical aspects of the work reported, rather than on the application domain. Any system presented should be described in useful detail with examples to illustrate its construction and use. Articles should display a well-grounded knowledge of the current scene in their field. All submitted articles are subject to refereeing.

Submission

All articles should be submitted in journal style. Submission copy: PDF including all figures and tables. Publisher copy: Word or Tex/LaTeX plus PDF, with separate files for figures and tables. For further information on style points, see http://www.wiley.com/bw/submit.asp?ref=0266-4720

Articles submitted to the journal should be original contributions, which are not under consideration for any other publication at the same time. Manuscripts should be submitted online at http://wileyonlinelibrary.com/journal/exsy. Full instructions and support are available on the site and a user ID and password can be obtained on the first visit. Support can be contacted by phone (+1 434 817 2040 ext. 167), e-mail (support@scholarone.com) or at http://mcv3support.custhelp.com If you cannot submit online, please contact the Editor at J.G.Hall@open.ac.uk

Copyright

Authors will be required to sign a Copyright Transfer Agreement (CTA) for all articles accepted for publication. Signature of the CTA is a condition of publication and articles will not be passed to the publisher for production unless a signed form has been received. Please note that signature of the CTA does not affect ownership of copyright in the material. (Government employees need to complete the Author Warranty sections, although copyright in such cases does not need to be assigned). After submission authors will retain the right to publish their paper in various medium/circumstances (please see the form for further details). To assist authors an appropriate form will be supplied by the editorial office. Alternatively, authors may like to download a copy of the form at http://www.wiley.com/go/ctaaglobal

Author Services

Author Services enables authors to track their article - once it has been accepted - through the production process to publication online. Authors can check the status of their articles online and choose to receive automated e-mails at key stages of production. The author will receive an e-mail with a unique link that enables them to register and have their article automatically added to the system. Please ensure that a complete e-mail address is provided when submitting the manuscript. Visit http://authorservices.wiley.com/bauthor for more details on online production tracking and for a wealth of resources including FAQs and tips on article preparation, submission and more.
