Aims and Scope
Journal of Flood Risk Management provides an international platform for knowledge sharing in all areas related to flood risk. Its explicit aim is to disseminate ideas across the range of disciplines where flood related research is carried out and it provides content ranging from leading edge academic papers to applied content with the practitioner in mind.

Readers and authors come from a wide background and include hydrologists, meteorologists, geographers, geomorphologists, conservationists, civil engineers, social scientists, policy makers, insurers and practitioners. They share an interest in managing the complex interactions between the many skills and disciplines that underpin the management of flood risk across the world.

The journal is managed by an international editorial team and all submissions will be subject to rigorous peer review, ensuring that only the highest quality papers are published.

Examples of areas covered include, but are not restricted to:
- Hydrology
- Coastal, Storm and Surge
- Climate Change
- Modelling
- Infrastructure Management
- Flood Event Management and Disaster Recovery
- Flood Forecasting/Warning
- Land Use Management/Spatial Planning
- Policy & Legislation
- Uncertainty Analysis and Risk
- Environment (Geomorphology, Sediments, Habitat)

- Health & Social Aspects of Flooding
- Economics and Insurance

Journal of Flood Risk Management is published by Wiley in partnership with the Chartered Institution of Water and Environmental Management.
