1  Servant leadership: A meta-analytic examination of incremental contribution, moderation, and mediation
   Allan Lee, Joanne Lyubovnikova, Amy Wei Tian and Caroline Knight

44  Micro work-family decision-making of dual-income couples with young children: What does a couple like us do in a situation like this?
   Heather Cluley and Tracy D. Hecht

73  Innovation climate: A systematic review of the literature and agenda for future research
   Alexander Newman, Heather Round, Shuanglong Wang and Matthew Mount

110 Pathways through organizational socialization: A longitudinal qualitative study based on the psychological contract
   Chris Woolford and David L. Guest

134 How dynamics in perceptual shared cognition and team potency predict team performance
   Josette M. P. Gevers, Jia Li, Christel G. Rutte and Wendelien van Eerde

158 How do career adaptability and proactive career behaviours interrelate over time? An inter- and intrapersonal investigation
   Daniel Spurk, Judith Volmer, Maximilian Orth and Anja S. Görtz

187  Hope and human capital enhance job engagement to improve workplace outcomes
   Adnan Özdemir

215 Feeling exhausted or vigorous in anticipation of high workload? The role of worry and planning during the evening
   Anne Casper and Sabine Sonnentag

243 Editorial acknowledgement

Author Guidelines

For full submission instructions and all other information, please visit: https://onlinelibrary.wiley.com/page/journal/20448325/homepage/forauthors.html

The Journal of Occupational and Organizational Psychology aims to increase understanding of people and organisational processes at work including:
- industrial, organisational, work, vocational and personnel psychology
- behavioural and cognitive aspects of industrial relations
- ergonomics and human factors
- industrial sociology

Innovative or interdisciplinary approaches with a psychological emphasis are particularly welcome. So are papers which develop the links between occupational/organisational psychology and other areas of the discipline, such as social and cognitive psychology.

1. Manuscript categories and requirements

We welcome the following varieties of paper:
- empirical research papers, containing new quantitative or qualitative data which address significant theoretical and/or practical concerns;
- papers which offer new theory and conceptualisation, perhaps accompanied by a critique of existing approaches;
- narrative and/or quantitative reviews of existing research which lead to new conclusions or insights into a field of research and/or practice;
- prescriptive articles advocating changes in research paradigms, methods, or data analytic techniques;
- analyses of practice in occupational and organizational psychology, where such analyses are driven by theory and/or sound data.

Registered Reports (please see online guidelines).

1. Manuscript categories and requirements

2. Preparing the submission

Contributions must be typed in double spacing. All sheets must be numbered.

Title page: Manuscripts should be preceded by a title page which includes a full list of authors and their affiliations, the corresponding author’s contact details, appropriate keywords, abstract and the data availability statement (see below).

Abstract: Provide an abstract of between 100 and 200 words, giving a concise statement of the intention, results or conclusions of the article. The abstract should not include any sub-headings.

Practitioner Points: All articles must include Practitioner Points – these are 2-4 bullet points, following the abstract, with the heading ‘Practitioner Points’. These should briefly and clearly outline the relevance of your research to professional practice.

Main document: As papers are double-blind peer reviewed, the main text file should not include any information that might identify the authors.

Supporting information should be supplied as separate files. Supporting information is information that is not essential to the article, but provides greater depth and background. It is hosted online and appears without editing or typesetting.

Tables and figures can be included at the end of the main document or attached as separate files but they must be mentioned in the text.

References should be prepared according to the Publication Manual of the American Psychological Association (6th edition).

3. Peer Review

We operate a triage process in which submissions that are out of scope or otherwise inappropriate will be rejected by the editors without external peer review. The online qualitative guidelines explain how the quality of research papers using qualitative methods will be judged. We aim to provide authors with a first decision within 90 days of submission.

4. Research Reporting Guidelines

Accurate and complete reporting enables readers to fully appraise research, replicate it, and use it. Authors are encouraged to adhere to recognised research reporting standards.

We also encourage authors to refer to and follow guidelines from:
- Future of Research Communications and e-Scholarship (FORCE11)
- The Gold Standard Publication Checklist from Hooymans and colleagues
- FAIRsharing website

5. Conflict of Interest

The journal requires that all authors disclose any potential sources of conflict of interest. Any interest or relationship, financial or otherwise that might be perceived as influencing an author’s objectivity is considered a potential source of conflict of interest. These must be disclosed when directly relevant or directly related to the work that the authors describe in their manuscript. If the authors have no conflict of interest to declare, they must also state this at submission.

6. Funding

Authors should list all funding sources in the Acknowledgments section. Authors are responsible for the accuracy of their funder designation.

7. Data Sharing and Data Accessibility

The Journal of Occupational and Organizational Psychology recognises the many benefits of archiving data for scientific progress. Archived data provides an indispensable resource for the scientific community, making possible future replications and secondary analyses, in addition to the importance of verifying the dependability of published research findings.

The journal expects that where possible all data supporting the results in papers published are archived in an appropriate public archive offering open access and guaranteed preservation. The archived data must allow each result in the published paper to be replicated in full to support the conclusions made. Authors are welcome to archive more than this, but not less.

All papers need to be supported by a data archiving statement, and the data set must be cited in the Methods section. The paper must include a link to the repository in order that the statement can be published.

If the authors cannot or do not intend to make the data publicly available, a statement to this effect along with the reasons that the data is not shared must be included in the manuscript.

8. Publication Ethics

Authors are reminded that the Journal of Occupational and Organizational Psychology adheres to the ethics of scientific publication as detailed in the Ethical principles of psychologists and code of conduct (American Psychological Association, 2010). The journal generally conforms to the Uniform Requirements for Manuscripts of the International Committee of Medical Journal Editors and is also a member and subscribes to the principles of the Committee on Publication Ethics. Authors must ensure that all research meets these ethical guidelines and affirm that the research has received permission from a stated Research Ethics Committee or Institutional Review Board; including adherence to the legal requirements of the study country.

Note this journal uses iThenticate’s CrossCheck software to detect instances of overlapping and similar text in submitted manuscripts.

9. Author licensing

If a paper is accepted for publication, the author identified as the formal corresponding author will receive an email prompting them to log in to Author Services, where via the Wiley Author Licensing Service (WALS) they will be required to complete a copyright license agreement on behalf of all authors of the paper. Authors may choose to publish under the terms of the journal’s standard copyright agreement, or OnlineOpen under the terms of a Creative Commons License. Authors who choose to publish using OnlineOpen will be charged a fee.

General information regarding licensing and copyright is available at: https://authorservices.wiley.com/author-resources/Journal-Authors/licensing/licensing-info-faqs.html To review the Creative Commons License options offered under OnlineOpen, please visit: https://authorservices.wiley.com/author-resources/Journal-Authors/licensing/open-access-agreements.html (Note that certain funders mandate a particular type of CC license be used).

BPS members and open access: if the corresponding author of an accepted article is a Graduate or Chartered member of the BPS, the Society will cover 100% of the APC allowing the article to be published as open access and freely available.

10. Publication process after acceptance

When an accepted article is received by Wiley’s production team, the corresponding author will receive an email notification with full instructions on how to provide proof corrections. Please note that the author is responsible for all statements made in their work, including changes made during the editorial process – authors should check proofs carefully.

Colour figures: Colour figures may be published online free of charge; however, the journal charges for publishing figures in colour in print. If the author supplies colour figures, they will be sent a Colour Work Agreement once the accepted paper moves to the production process. If the Colour Work Agreement is not returned by the specified date, figures will be converted to black and white for print publication.

11. Early View

The journal offers rapid publication via Wiley’s Early View service. Early View (Online Version of Record) articles are published on Wiley Online Library before inclusion in an issue. Before we can publish an article, we require a signed license. Once the article is published on Early View, no further changes to the article are possible. The Early View article is fully citable and carries an online publication date and DOI for citations.
