Journal of Texture Studies

JTS 50th Anniversary Special Issue

Contents

Editorial
From tastes good to mouth-feels good: A remark for the 50 years success of the Journal of Texture Studies
Jianshe Chen ................................................................. 5

Invited Reviews
Tribology and its growing use toward the study of food oral processing and sensory perception
Heather M. Shewan, Clementine Pradal, and Jason R. Stokes .......................................................... 7

The texture and taste of food in the brain
Edmund T. Rolls ........................................................... 23

A review of the rheological properties of dilute and concentrated food emulsions
Yuqing Zhu, Hongxia Gao, Wei Liu, Liqiang Zou, and David Julian McClements ................................. 45

Evaluating chewing function: Expanding the dysphagia field using food oral processing and the IDDSI framework
Julie A. Y. Cichero ........................................................... 56

Discussion Paper
The role of saliva in oral processing: Reconsidering the breakdown path paradigm
Michael W. Boehm, Gleb E. Yakubov, Jason R. Stokes, and Stefan K. Baier ......................................... 67

Research Articles
Viscosity drives texture perception of protein beverages more than hydrocolloid type
Ty B. Wagoner, Esra Çakır-Fuller, Rebecca Shingleton, MaryAnne Drake, and E. Allen Foegeding ............. 78

The microstructural, melting, rheological, and sensorial properties of high-overrun frozen desserts
Samantha R. VanWees, Scott A. Rankin, and Richard W. Hartel ....................................................... 92

Acid induced gelation behavior of skim milk concentrated by membrane filtration
Ying Li and Milena Corredig ................................................ 101

Shear and extensional rheology of acid milk gel suspensions with varying ropiness
Georg Surber, Doris Jaros, and Harald Rohm ......................................................... 111

Understanding the crispy–crunchy texture of raw red pepper and its change with storage time
Maria Dolores Alvarez, Cristina Velarde, Laura Barrios, and Beatriz Herranz ....................................... 120
Research Articles
Role of the bolus degree of structure on the protein digestibility during in vitro digestion of a pea protein-fortified sponge cake chewed by elderly
Melissa Assad-Bustillos, Juliette Palier, Hanitra Rabesona, Yvan Choiset, Guy Della Valle, and Gilles Feron ................................................................. 134

Oral processing of hydrogels: Influence of food material properties versus individuals’ eating capability
Emma M. Krop, Marion M. Hetherington, Sophie Miquel, and Anwesha Sarkar ......................... 144

The impact of modification techniques on the rheological properties of dysphagia foods and liquids
Marilize de Villiers, Ben Hanson, Legini Moodley, and Mershen Pillay ..................... 154

Optimizing a determination of chewing efficiency using a solid test food
Hilbert W. van der Glas, Ting Liu, Yifan Zhang, Xinmiao Wang, and Jianshe Chen .................. 169

Consumer textural food perception over time based on Mouth Behavior
Melissa Jeltema, Jacqueline Beckley, Jennifer Vahalik, and Jeff Garza .................. 185

Letter to the Editor
Release of updated International Dysphagia Diet Standardisation Initiative Framework (IDDSI 2.0)
Julie A. Y. Cichero, Peter T. L. Lam, Jianshe Chen, Roberto O. Dantas, Janice Duivestein, Ben Hanson, Jun Kayashita, Mershen Pillay, Luis F. Riquelme, Catriona M. Steele, and Jan Vanderwegen .................. 195
