Aims and Scope. Neurogastroenterology & Motility publishes original research and topical reviews (commissioned), in English, on basic and clinical aspects of gastrointestinal motility and its control by myogenic, neural and chemical mechanisms, as well as basic and clinical aspects of brain-gut interactions and on how the central, autonomic and/or enteric nervous systems interact in the control of gastrointestinal motility or other gastrointestinal functions including absorption, secretion, vasomotor function and immunology. In addition, focused editorial viewpoints (commissioned), abstracts of symposia, meeting reports and notices of ENMS and ANMS business and matters of interest to members are published.

Production Editor. Gwendoline Sim (e-mail: nmo@wiley.com).
