Wiley’s Corporate Citizenship initiative seeks to address the environmental, social, economic, and ethical challenges faced in our business and which are important to our diverse stakeholder groups. Since launching the initiative, we have focused on sharing our content with those in need, enhancing community philanthropy, reducing our carbon impact, creating global guidelines and best practices for paper use, establishing a vendor code of ethics, and engaging our colleagues and other stakeholders in our efforts. Follow our progress at www.wiley.com/go/citizenship.

Aims and Scope:

The aim of Pediatric Transplantation is to publish original articles of the highest quality on clinical experience and basic research in transplantation of tissues and solid organs in infants, children and adolescents. The journal seeks to disseminate the latest information widely to all individuals involved in kidney, liver, heart, lung, intestine and stem cell (bone-marrow) transplantation. In addition, the journal publishes focused reviews on topics relevant to Pediatric Transplantation and well as timely editorial comment on controversial issues.

The scope of the journal includes articles involving clinical research, case-reports delineating universal clinical consequences and basic transplant immunobiology related to Pediatric Transplantation. Each issue contains Pediatric Transplant Grand Rounds which consists reports from institutions worldwide aimed at sharing pertinent clinical information with those caring for pediatric transplant recipients.

The publication of a journal devoted to transplantation in infants, children and adolescents is extremely important because of the increasing clinical use of tissue and organ transplantation to resolve catastrophic circumstances not amenable to other therapeutic approaches. The journal serves the needs of pediatricians, pediatric surgeons, transplant surgeons, pediatric urologists, pediatric nephrologists, pediatric gastroenterologists, pediatric oncologists, pediatric pulmonologists and pediatric haematologists/ oncologists, all of whom will find great advantage in the timely update information offered by the journal.

Abstracting and Indexing Services

The Journal is indexed by EBSCO, Current Contents/Clinical Medicine, Index Medicus/ MEDLINE, ISI Alerting Services, EMBASE/Excerpta Medical, Science Citation Index Expanded, HEED: Health Economic Evaluations Database (Wiley-Blackwell), Journal Citation Reports/ Science Edition (Thomson Reuters), Sociedad Iberoamericana de Información Científica (SIIC) Data Bases, and Chemical Abstracts.

Pediatric Transplantation accepts articles for Open Access publication. Please visit https://authorservices.wiley.com/author-resources/Journal-Authors/open-access/onlineopen.html for further information about OnlineOpen.
