

Special Issue: Progress in Wind Energy Research from the NAWEA/WindTech 2022 Conference

Submission Deadline: September 13, 2022

The *Wind Energy* journal is hosting a special issue of works from the NAWEA/WindTech 2022 Conference to provide interested authors with the opportunity for peer-reviewed publication of their research highlighting recent progress and advances in wind energy research across the thematic areas of the conference: grid integration, social/environmental aspects, offshore wind, wind turbine and wind plants, atmospheric/ocean science, and applications & education in wind energy.

Authors interested in publishing in the special issue will be required to submit a full paper a week before the conference (no later than September 13, 2022). Publication of papers will follow the normal and full *Wind Energy* review process. The number of papers in the special issue will be limited to the best quality research articles that are most representative of the conference. Presentations at the conference will be considered in paper selection.

Authors must submit articles through the [Wind Energy ScholarOne site](#). The schedule is as follows.

September 13, 2022 Due date for online submission of manuscripts

September 30, 2022 Authors are notified about selection for review in the special issue. (Articles not selected for the special issue may be considered for regular submission to *Wind Energy*.)

December 31, 2022 Initial reviews completed

Wind Energy is an Open Access journal, and authors will be responsible for applicable publication fees. For additional information about publishing Open Access in *Wind Energy* or special waivers and discounts, authors are referred to the following websites:
