

## Call for Papers

### Special Issue on “Multidimensional Finance, Insurance and Investment”

Guest Editors

Davide La Torre<sup>a</sup>, Sabri Boubaker<sup>b</sup>, Blanca Pérez Gladish<sup>c</sup> and  
Constantin Zopounidis<sup>d</sup>

<sup>a</sup>*SKEMA Business School, France*

<sup>b</sup>*EM Normandie Business School, France*

<sup>c</sup>*University of Oviedo, Spain*

<sup>d</sup>*Technical University of Crete, Greece*

A large number of researchers have investigated methods and procedures designed to solve problems in finance, insurance and investment, formulated through analytical operational research models in a multidimensional framework that takes into consideration multiple conflicting and incommensurable decision objectives.

In order to promote the development of multidimensionality within these research fields, the *International Transactions in Operational Research* will publish a special issue devoted to this subject. Topics of interest include (but are not limited to) Multi-attribute portfolio selection, Multi-criteria decision aid in finance, Multiple objective programming in finance, Stochastic programming in finance, Option pricing, Portfolio analysis, Asset and liability management, Financial economics, Interest rate models, Bank management, Capital budgeting, Finance applications, Corporate governance, Insurance applications, Fuzziness and uncertainty in finance, Financial planning, and Financial engineering.

This special issue will host the best papers that will be presented at the upcoming ICMFII 2020 conference, the 8th International Conference on Multidimensional Finance, Insurance and Investment, see <http://icmfii2020.sciencesconf.org/>. However, the special issue is also open to submissions from other researchers working in these fields and we strongly encourage contributions from the entire community.

The deadline for submissions is November 30, 2021.

Each paper will be peer-reviewed according to the editorial policy of the *International Transactions in Operational Research* (ITOR), published by the International Federation of Operational Research Societies (IFORS). Papers should be original, unpublished, and not currently under consideration

for publication elsewhere. Contributions should be prepared according to the instructions to authors that can be found on the journal homepage. Authors should upload their contributions using the submission site <http://mc.manuscriptcentral.com/itor>, indicating in their cover letter that the paper is intended for this special issue. Other inquiries should be sent directly to Davide La Torre ([davide.latorre@skema.edu](mailto:davide.latorre@skema.edu))
