

# Concurrency and Computation Practice and Experience

## Call for Papers

### CCPE Special Issue on WSCAD2022

This special issue will be based on extended versions of the best papers selected from the XXIII Brazilian Symposium on High Performance Computational Systems (WSCAD), Florianópolis, Santa Catarina, Brazil, October 19-21, 2022. The WSCAD workshop has been presenting important research in the fields of computer architectures, high performance computing, and distributed systems, since the beginning of the 2000s. It is a traditional Brazilian conference on High Performance Computing and the best papers from several previous years' editions were already published on CCPE.

The scope of the current special issue is broad and representative of the multidisciplinary nature of High Performance Computing and Computer Architecture research domains, including: methodological, technology, application, and system papers. The topics covered include architecture issues, compiler optimization, performance evaluation, parallel algorithms, energy efficiency, and applications.

Please submit your paper to [Manuscript Central](#) as “WSCAD2022 Special Issue” special issue. Submissions should be prepared for publication according to the journal [submission guidelines](#). It is expected that the submissions will address the topic of the conference and contain at least 50% new content regarding any previously published paper. Authors are encouraged to submit high-quality, original work that has neither appeared in, nor is under consideration by, other journals.

For more details on the conference, please visit: <https://wscad.ufsc.br>.

#### Important Dates:

Manuscript submission deadline: January 31, 2023

Expected acceptance deadline: May 1, 2023

Expected publication date: June 1, 2023
