## CAMH – Call for Randomised Clinical Trials

*Child and Adolescent Mental Health* is inviting authors to submit their randomised clinical trials on all topics relating to child and adolescent mental health, and in particular, those that are clinically relevant and relating to the effectiveness of treatment models. All RCTs should endeavour to meet the interests and needs of researchers and practitioners for robust, evidence-based science that informs on ‘what works, for whom and under what circumstances’. As such, we now ask that all submissions to conform to reporting standards set out in the CONSORT statement (<http://www.consort-statement.org/>).

Child and Adolescent Mental Health (CAMH) publishes high quality, peer-reviewed child and adolescent mental health services research of relevance to academics, clinicians and commissioners internationally. The journal's principal aim is to foster evidence-based clinical practice and clinically orientated research among clinicians and health services researchers working with children and adolescents, parents and their families in relation to or with a particular interest in mental health.

CAMH is published quarterly. The journal has been steadily gaining impact factor and international readership over the years.

Author guidelines can be found here
